

## Surveys

With over a decade of experience, ClearPicture has constructed standard survey instruments that can be used effectively as the basis for your survey program. Whether they are used as-is or used with some customization to fit your specific needs, our surveys can be tailored to fit your program objectives and budget. Working from a standard, proven instrument is often a sensible way to keep budgets under control without risking quality or validity of the data.

ClearPicture recognizes that many organizations have already been doing their own surveys. Our tools allow us to apply the same quality and data-validation checks used on our surveys to your instrument so you have the same high level of confidence in the quality of the data. ClearPicture technology not only supports the ability to use your own survey instrument, but we can also integrate past survey results into our platform for further data analysis and to show trends from previous administrations.

Our standard surveys include the following:

- Employee Entry
- Employee Engagement
- Employee Exit
- Customer Satisfaction
- Merger and Aquisition
- Global Employee Survey
- Association Survey
