

Research

If your organization conducts research for yourself or for others, ClearPicture can provide you with the tools to enable efficient management of your surveys and data analysis.

There is relatively little upfront investment needed to train your staff how to use Insight software. And ClearPicture can provide you with that training.

In addition, ClearPicture professionals experienced in survey research are available to assist you in using our software to its full potential. We follow industry-approved best practices for system security and data backup. And we monitor our hosting infrastructure 24x7x365.

With the ClearPicture Service Bureau solution, we do even more. In addition to hosting your online survey, our expert staff will provide the programming and project management. Simply give us your questionnaire, and we'll give you the results.
