

Partners

We help our partners keep their clients happy. We start with a robust, stable and secure technology platform allowing scaleable solutions for high-capacity partner-branded data collection and customized reporting solutions that meet our partners' growing needs. We add value with our professional I/O consulting, providing guidance and support through the partnership if required. This winning combination provides a solid foundation upon which our partners' organizations can grow with confidence.

Current Partners:

- Mercer
- WFD Consulting

- IBM

Partnership Benefits

Solid technology platform
Dedicated, industrial-strength servers designed to handle large numbers of concurrent and high-volume projects. We provide secure database management and built-in scalability.

- Benefit: removes partner expense of investing in their own infrastructure, especially as they grow
Self-directed, flexible data mining

Clients can analyze their data by any number of ad-hoc requirements.

- Benefit: saves expense of paying for special-request reports
Easy-to-understand, flexible and real-time reports

Our flexible and customizable reports meet our clients' format and content needs. Real-time reporting lets clients observe and measure trends as they occur, initiating reporting processes to meet tight deadlines.

- Benefit: flexibility in reporting options ensures you deliver the information the client needs in a timely and user-friendly manner, allowing speedy action implementation, for quick improvements to bottom line
Multiple languages and accessibility

ClearPicture delivers surveys and reports in 50 languages, including right-to-left languages such as Arabic and Hebrew, and has successfully customized software to meet and exceed accessibility requirements for specific partner needs.

- Benefit: language translations and accessibility increase global reach and help build employee trust for increased engagement and productivity

Metrics and measurement
Our I/O consultants are available for consultation to provide support throughout the solution process.

- Benefit: setting up the process properly from the beginning eliminates surprises, saving time and money for the duration of the project
