

## insight - Survey Management

Survey programs follow the same specific, repeatable steps each time they are executed. ClearPicture insight manages those steps through our easy to use Survey Management Portal. We load the survey for you, performing all the system checks, validation and testing behind the scene to ensure accuracy and reliability, and from there, you can manage the program as much, or as little, as you want. Send the e-mail invitations, monitor survey participation, send automatic reminders, prepare new reports even before the survey shuts down, and manage the organization structure using insight Arboretum . One stop to manage all aspects.

Need to re-launch the survey for a new group or to run a 'pulse survey'? Just log in. The survey will be there, ready to go.

Want to see which survey you used last year so you can determine what changes need to be made for this year's program? Just log in. It will be there, exactly as the employees saw it last year. No more hunting for that 'final, final' version.

With permission-based control of features and data, insight Survey Manager puts the control back in your hands. Very easy to use... Very powerful.
